

Turnkey and tech-enabled hardware decommissioning.

Mitigate risk, maximize value and evolve your data center with the world's most secure, sustainable, and efficient decommissioning solutions.

One-stop shop decommissioning.

ITRenew Secure ITAD.

Hardware decommissioning can put a significant burden on your data center. From operational strain to complex processes, a lack of streamlined execution to the risk of a data breach, you need an expert partner to handle it all.

The world's leading cloud service providers, data center operators, and enterprises partner with ITRenew to unlock untapped potential and value from their outbound hardware. Our integrated approach maximizes financial returns for our clients, reduces environmental impact, and creates access to new market opportunities.

From deployment to decommissioning, our comprehensive expertise, technology, and services help you get the most out of the full lifecycle of your data center assets.

Scalable, secure, efficient. ITRenew is your single point of contact for end-to-end decommissioning.

ITRenew is your partner for:

- Total, secure data destruction
- Efficient certified decommissioning processes
- Unmatched value recovery
- eWaste and carbon reduction

Customized decommissioning solutions for your business.

Designed in collaboration with the world's largest hyperscalers, ITRenew offers efficient, secure, and scalable decommissioning services tailored to your unique needs.

No matter how large or varied your operational footprint is, ITRenew has the experience, physical resources, and global presence to handle it. We operate in the most complex environments all over the world across owned sites, co-location facilities, and small points of presence.

Every ITRenew facility is designed specifically for processing data center hardware. Whether full racks or parallelized equipment, our specialized logistics chain offers the highest level of security, efficiency, and effectiveness.

Partnered with the largest cloud service providers and enterprises across the globe:

- North America
- Asia-Pacific
- Latin America
- Europe
- Middle East
- Africa

Maximize value recovery.
Mitigate risk.
Without disruption.

Over 20 years of experience.

The ITRenew advantage.

Speed.

Most efficient data center solutions on the planet, 7-10X faster end-to-end.

Compliance.

We provide a fully traceable audit trail for each serialized asset, from erasure to final disposition.

Solutions that fit.

We customize processes to fit your precise requirements, with the flexibility to adjust for the most complex scenarios.

Eliminate risk.

We fully erase 95%+ of drives—compared to the industry norm of 50%—and fully decommission 100%.

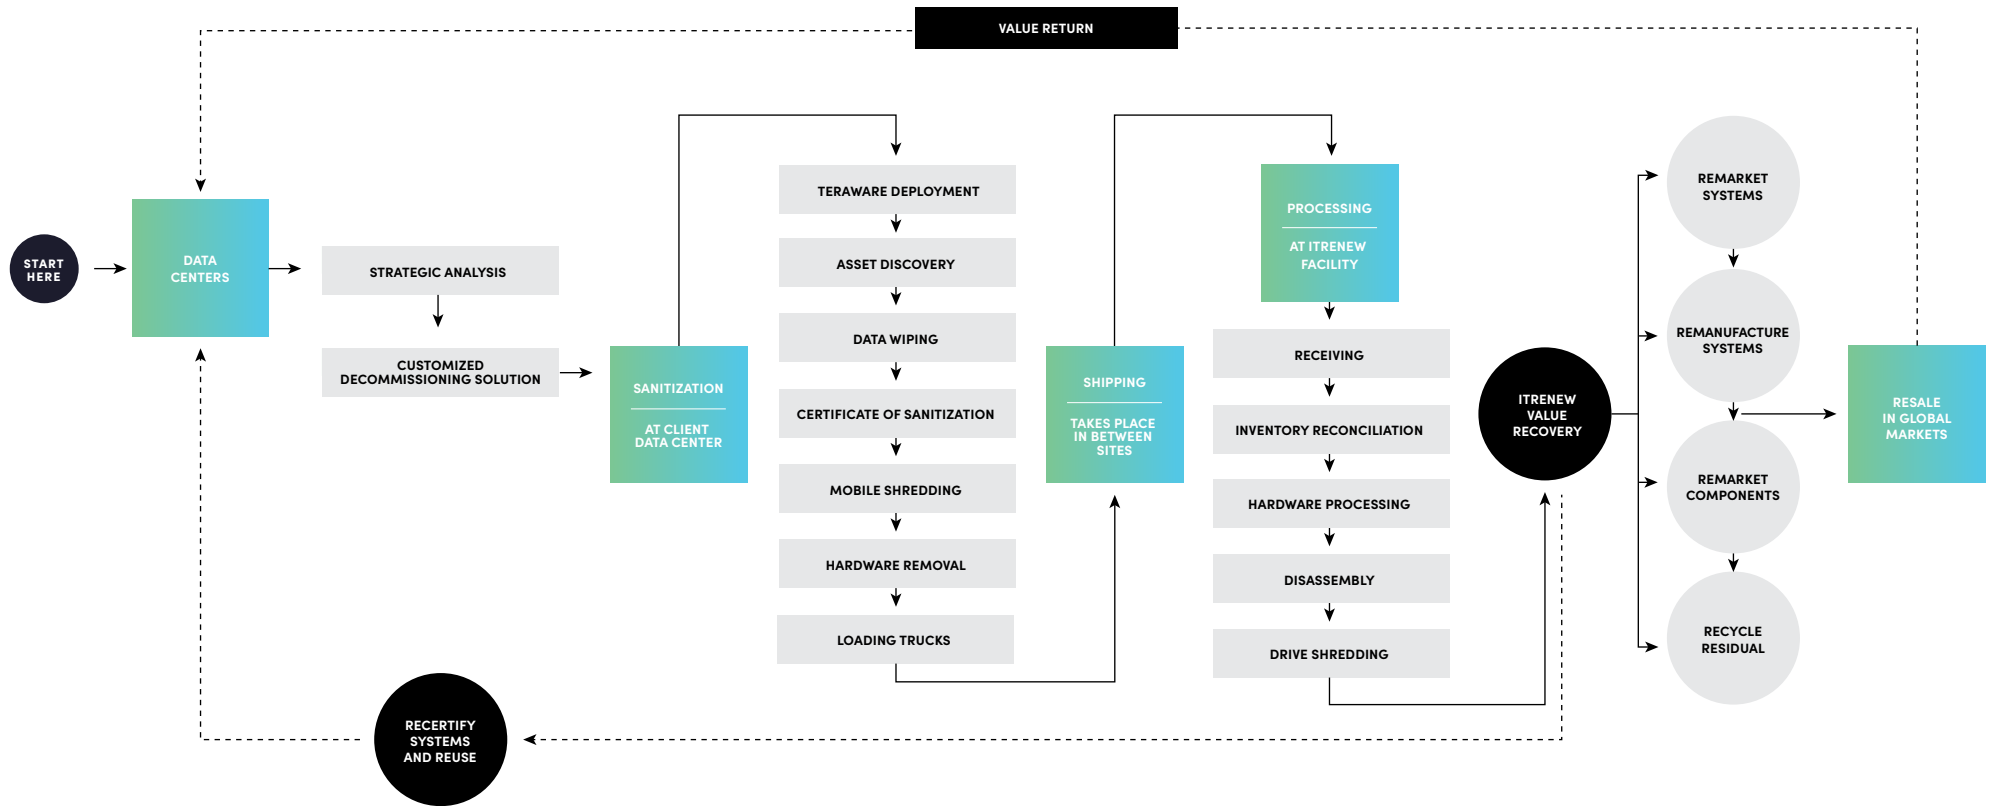

Bottom line.

\$1 billion-plus generated for our clients, with up to 45% higher value recovery.

Decommissioning step-by-step.

Increase speed and operational efficiency.

No matter the challenge or the number of assets, our proprietary data erasure software, [Teraware](#), provides an efficient and complete solution to every data sanitization challenge imaginable. With complete data destruction in 1- 2 days, we deliver the world's most efficient onsite decommissioning solution.

Our hyperscaler expertise enables us to optimize processes and logistics to solve your most complex decommissioning needs without disrupting your business.

With ITRenew, you can expect:

- Fully transparent, scalable data erasure services
- 95% data erasure yield in one to two days
- Streamlined physical removal and logistics

That's why these top-tier partners chose ITRenew:

facebook Uber Dropbox ORACLE

Onsite wiping completed in:

1-2 days vs. **4-6 weeks**

with ITRenew

with competitors

1M

servers processed annually

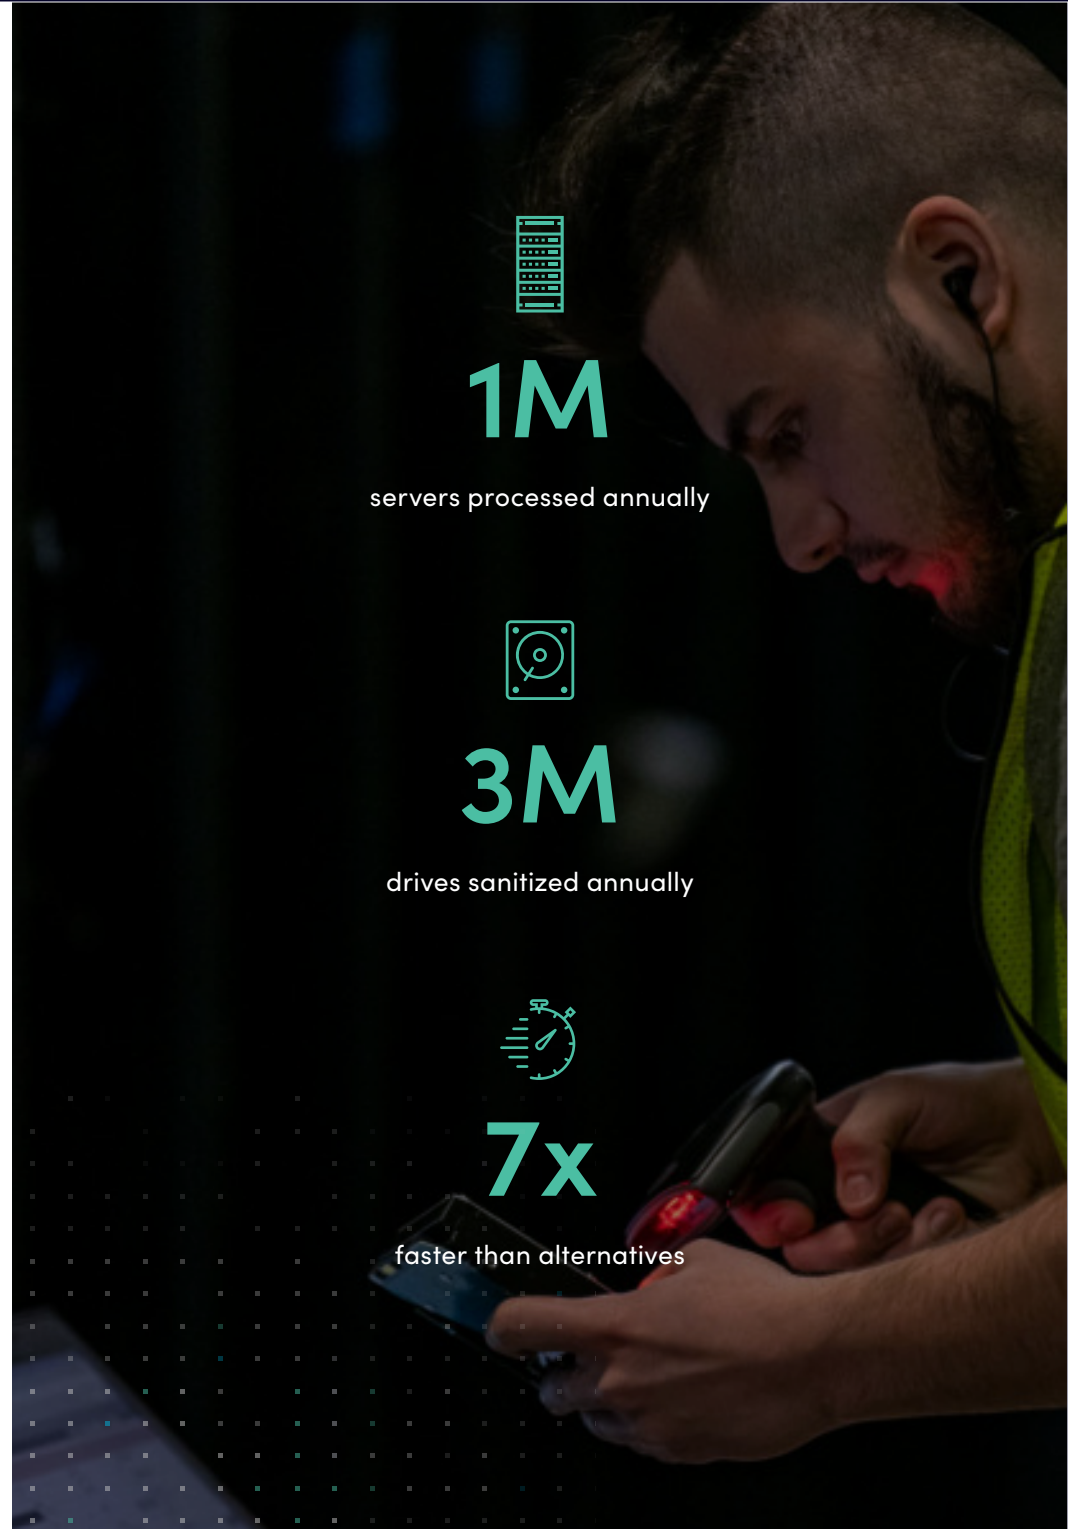

3M

drives sanitized annually

7x

faster than alternatives

45%

ITRenew's recertified/remanufactured assets sell for up to 45% higher than competitors

\$1B+

Generated for our clients from the resale of decommissioned assets

Maximize returns. Minimize risks.

Let our experts help you maximize your financial returns through the resale of decommissioned assets.

ITRenew continuously develops leading-edge strategies to sell assets at scale and deliver the maximum ROI to our clients.

ITRenew is the world's # 1 reseller of hyperscale data center hardware.

Add millions to your bottom line with returns that are 45% higher than what our competitors can offer.

One-stop-shop for the entire hardware asset lifecycle. ITRenew:

- Recertifies, reconfigures, and resells full systems
- Builds remanufactured systems
- Remanufactures memory
- Sells components

By partnering with ITRenew, you can:

- Extend the lifecycle of hardware assets
- Design hardware for longevity, with the creation of new market opportunities and mechanisms in mind
- Capitalize on the \$4.5 trillion global circular economy
- Enable second lives for your outbound hardware to reduce eWaste and reach your sustainability goals faster

Achieve maximum data security.

An end-to-end platform approach to security.

What sets ITRenew apart? The answer lies in Teraware, our proprietary data sanitization software. Teraware fully sanitizes HDDs and all flash-based storage and reconciles inventory. No data has ever been discovered on drives we have erased. Ever.

We also complete physical reconciliation to confirm we've accounted for every drive. This process virtually eliminates the potential for hard-drive escapes, delivering a 95%+ yield vs. competitors' 50%.

Assured regulatory compliance.

ITRenew guarantees the highest regulatory compliance. In fact, we have ADISA Data Sanitization Certifications and provide a complete audit trail, as well as Certificates of Sanitization and Destruction, for each serialized asset.

ADISA ADISA Data Sanitization Certifications.

Passed Asset Disposal & Information Security Alliance (ADISA) Threat Matrix level 2 for forensic data erasure of solid-state drives (SSDs) and hard disk drives (HDDs)

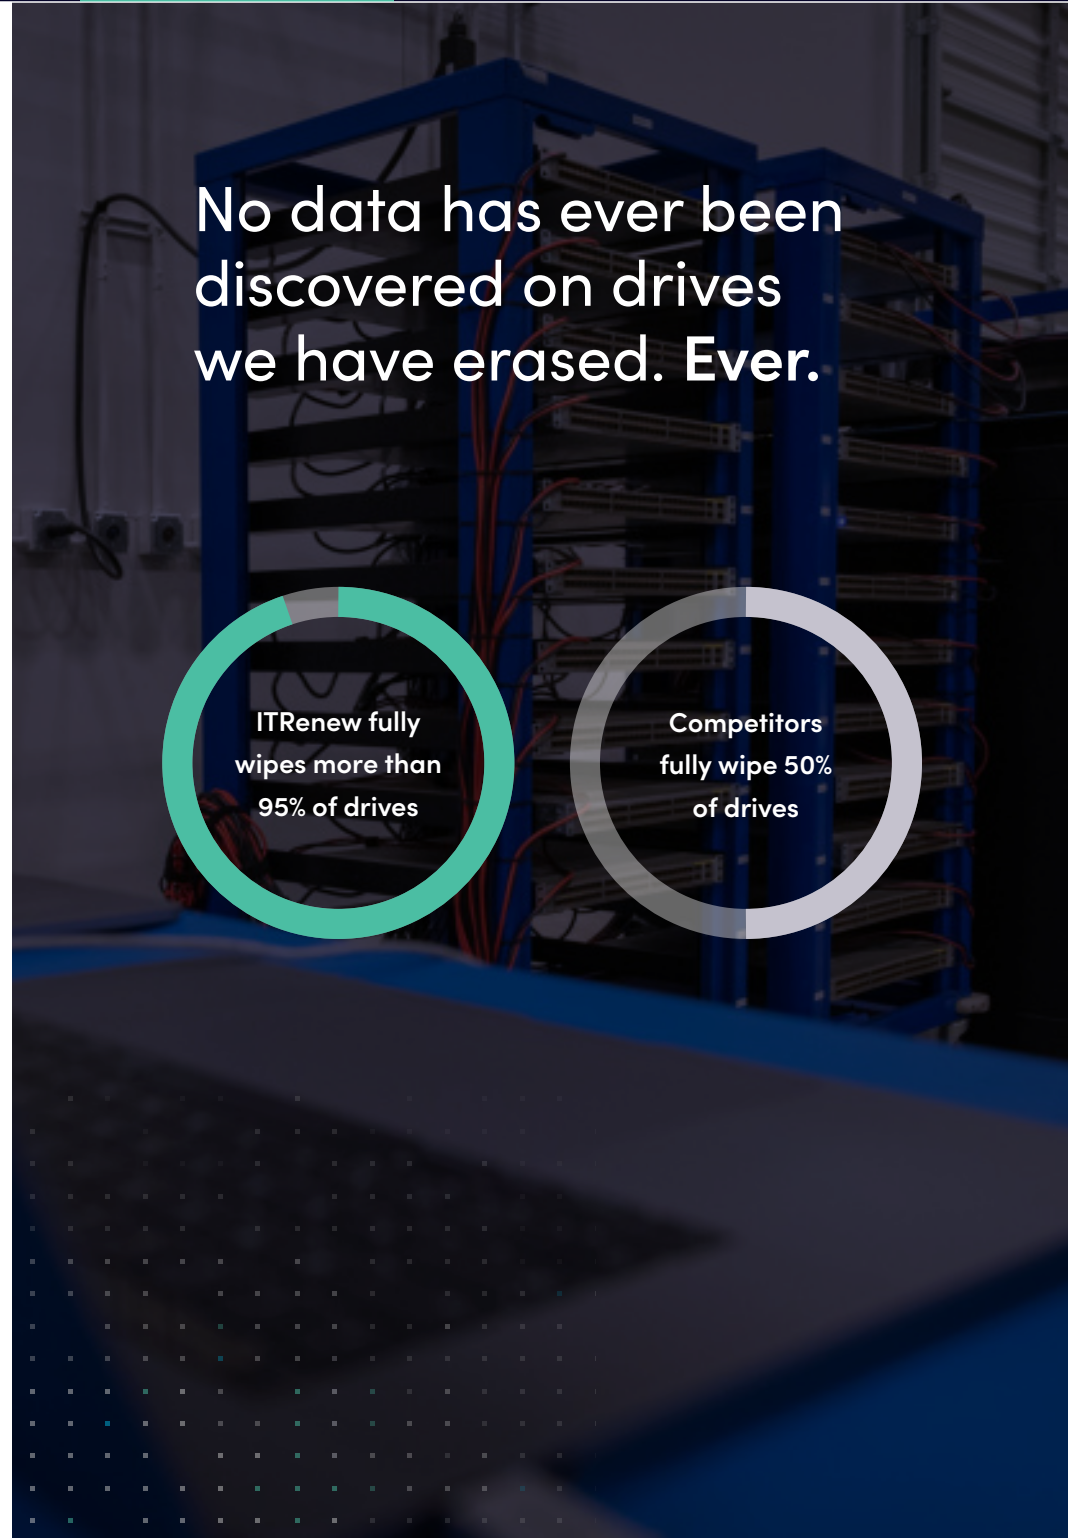

This industry-leading certification complies with numerous vertical regulations including:

Key certifications:

- ISO14001 (environmental management)
- R2 Responsible Recycling
- ISO 27001 (Information Security)

No data has ever been discovered on drives we have erased. Ever.

Eliminate risk & maximize financial returns with ITRenew.

To meet tomorrow's demands, you need to scale faster than ever before. So let ITRenew customize a decommissioning solution that removes the operational burden and helps you maximize the lifetime value of your assets.

- **Increase operational efficiency** with ITRenew's turnkey processes and logistics.
- **Yield higher value recovery** with a completely rearchitected data center asset lifecycle.
- **Achieve maximum security** ensured via ADISA Data Sanitization Certifications and ITRenew's end-to-end audit trail.

ABOUT ITRENEW

ITRenew, acquired by Iron Mountain in 2022, is revolutionizing data center infrastructure, the backbone of our digital world, through our innovative engineering, processes and technologies. Our circular data center models empower hyperscalers to unleash the full potential of their hardware and offer the broader industry cutting-edge solutions that raise the bar for performance, scalability and sustainability.
