

REUSE, RECOVER, AND DISPOSAL (R2D1) POLICY

ITRenew, Inc. is committed to managing end-of-life electronics, components, and materials by:

1. Screening, testing, and refurbishing equipment and components to promote their REUSE above all else, when contractually permitted;
2. Demanufacturing residual, non-reusable equipment, and sort the resulting commodities to maximize clean RECOVERY of metals, plastics, and all other economically feasible materials;
3. Directing all RECOVERY materials and commodities to properly-equipped and RESPONSIBLE facilities;

And,

4. Directing all other remaining materials to properly-equipped energy recovery or disposal facilities ONLY after all other reasonable attempts have been made to REUSE or RECOVER the material.

This policy shall be communicated to all potential and actual downstream vendors, in accordance with due diligence audits, prior to any respective shipments.
